ASX Release

**Leaf Resources Limited notification under ASX Waiver and ASIC Relief;
Extended reporting and lodgement Deadlines**

This announcement is to notify that Leaf is relying on ASIC Relief to extend the lodgement date for its audited/reviewed accounts. Leaf will immediately make a further announcement to the market if there is a material difference between its unaudited/unreviewed accounts and its audited/reviewed accounts.

About Leaf Resources

Leaf and EQ technologies are highly complementary as both enable the replacement of petroleum-based chemicals and plastics with the aim of moving markets towards the bio economy. In addition, the extraction process employed by EQ results in a cellulosic 'waste' product that is a potential feedstock to LER's proprietary "Glycell"TM process for producing clean industrial sugars.
